## Third Grade Newsletter

October 2015

### What are we learning?

#### Language Arts

This month in language arts we will continue with the adventures of Charlottes' Web. We have completed chapter 6 and we will continue to journal and summarize the next chapters in our book. In regard to writing, we have completed our unit on expository writing in English and we will now move to writing narrative in Spanish.

#### Mathematics

**Module 2: Measurement**  
In math we will be moving on to measurement including volume. Please be aware that math is now in English and the homework will be in English as well. Following with the new Common Core Standards students will be working with measurement including volume in the metric system.

#### Science

As we wind down with our unit on adaptations we move forward to learn about traits and heredity. The students will be exposed to the concept of heredity by identifying some traits that they themselves have inherited. This month we will be visiting the University of California Riverside's Botanical Gardens where we will learn about adaptations of plants in our own backyard.
